### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement filed 31 March 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al. (United States Patent No. 4,949,737) in view of Betrabet et al. (United States Patent No. 5,618,281).

Nakamura et al. discloses a wig comprising a cap formed of strips of elastic fabric onto which wefts of hair are sewn. The inner side of the cap has an adhesive coating. Nakamura et al. does not disclose the adhesive as being polysiloxane. Betrabet et al. disclose that it is known in the art to use polysiloxane adhesive to adhere articles to the skin and hair because it can be peeled off with little or no pain and leaves no appreciable residue (col. 1, line 65 through col. 2, line 6). It would have been obvious to use polysiloxane adhesive with the wig of Nakamura et al.

as taught by Betrabet et al. in order that the wig be peeled off with little or no pain and leave no appreciable residue. Regarding claim 4, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use between 100 and 300 g/m<sup>2</sup> polysiloxane coating, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
